# OneScreen Booking Module

*Guided Variant Employing Multiscreen Progression*

---

## Guided Steps 1, 2, 3a: Availability, Guests, Room

### COMMENT CONCERNING OPENING OneScreen IN THE SAME BROWSER:

One of the most critical errors committed repeatedly with the users tested was regular use of the "back" button on the browser. This action calls for a very strong recommendation that this OneScreen opens in a new browser window.

Bill mentioned that in his conversation with Jack, Jack thought we were going to open this in the same browser window; I must re-emphasize that this would keep the user from a smooth and successful purchase experience.

### COMMENT CONCERNING CALENDAR LAYOUT OF DAYS:

After reviewing calendars on many websites, and my past testing of users, the most common layout is Sunday through Saturday. In terms of usability, it's my recommendation to leverage the user's familiarity.

Follow the numbers from 1 to 5 to complete your reservation. If you have questions click the [?](#) icon to obtain additional information.
